

NON ZERO SUM ENSEMBLE: SPECIAL PERFORMANCE FOR VSMM2017

UCD Belfield Campus Gerard Manley Hopkins Centre
(UCD International Office), Roebuck, Dublin

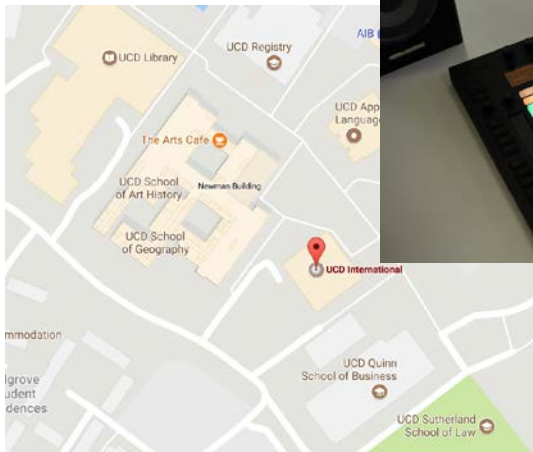

November 1st - 7-8:30pm

VSMM2017 is delighted to welcome the Non Zero Sum Ensemble to Dublin for the third and final part of their international performance showcase.

Sponsored by the Wellcome Trust.

NonZeroSum- professional musicians of diverse abilities, using new technology.

In this richly immersive music event, Acoustronic, a group of musicians using tablets and other new music technology, perform the new piece NonZeroSum by Frank Lyons. The piece is derived from game theory concepts in which the amplified string instruments and digital instruments come together and compete, with no winner or loser. The piece has distinct sections including improvisations whereby the players respond to graphic symbols drawn in real time using colour and shape coding.

UCD Belfield Campus Gerard Manley Hopkins Centre (UCD International Office), Roebuck, Dublin

Acoustronic will perform their own ambient sound world combining samples, loops and some free improvisation in two new pieces Music for 5 and Voices for 6.
